## DETAILED ACTION

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 11, drawn to a semiconductor device, classified in class 257, subclass 501.
- II. Claims 12 - 25, drawn to a method of making a semiconductor device, classified in class 438, subclass 359.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process, as claimed, can be used to make other and materially different product(s) or (2) that the product, as claimed, can be made by another and materially different process (MPEP 806.05(f)). In the instant case, unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, for example, in Claim 15, the cap layer could be formed by sputtering rather than by a CVD process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, as shown by their different classification, restriction for examination purposes, as indicated, is proper.

Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be

Art Unit: 2811

traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.17(i).
